

PrismFX™
Color-Shifting Finishes

PrismFX™ Color-Shifting Finishes

Introducing PrismFX™ finishes—a new coating option for Reynobond® and Reynolux® that can give your building a look as dynamic as your design. This innovative coating creates subtle color shifts in different lighting conditions. So a building that appears green, blue or silver in the morning can shift to copper, violet or gold in the afternoon. With nine unique color-shifting combinations available, you can change people’s perceptions of your building each and every day. Bring a whole new dimension to your design—with PrismFX™ finishes.

PrismFX™ color-shifting finishes are part of our Duragloss® architectural family of coatings. Like all our Duragloss® coatings, PrismFX™ finishes are a high-performance paint system that provides excellent flexibility and film adhesion for forming. It is time-tested and is resistant to humidity, impact, salt spray, pollution and abrasion, making it suitable for all outdoor architectural applications and a wide range of other specialty uses. And, all nine of our standard PrismFX™ finishes are backed by a 20-year warranty.
